Myriad products are shown in product section where user can filter the product section with prices like highest and lowest price and also filter products with respect to Men and women. User can find products according to the category and also search new products in what new section. User can select product and can make cart .After the completion user can checkout and place order.

TECHNOLOGY : HTML , CSS , SCSS , BOOTSTRAP, REACT, REACT-ROUTER, REDUX

Blood Donation

</> **CODE**

FEATURE : A Rect js web application with RESTful Api's by django rest framework where there is a unique user authentication by Email. After authentication user has to create his profile . User can see the blood donation campaign to donate blood. User can search donor according to the city and related areas. User can send request and and can follow the donor. user can make posts as well as can see his followed donors posts and cam comment on the posts.

TECHNOLOGY : HTML , CSS , SCSS , BOOTSTRAP, REACT, REACT-ROUTER, DJANGO REST FRAMEWORK, PostgreSQL

Movement Pass

</> **CODE**

FEATURE : A Rect js web application with RESTful Api's by django rest framework where Frontend users create movement pass to go outside without any problem facing .First the user register or login to the site. Then apply for movement pass. Second the backend admin will approve the pass if the application is valid. Otherwise the admin can delete the pass. Third the front user can see their applied pass in their Dashboard. When a pass is created by a user the application automatically generates a QR-Code Image as well as a Tracking ID instant. Fourth The front user can download the pass only when the admin approve the pass.

TECHNOLOGY : HTML , CSS , SCSS , BOOTSTRAP, REACT, REACT-ROUTER, DJANGO REST FRAMEWORK, PostgreSQL
